2011 JAN 25 AM 9:04

- In August 2010, Egyptian satellite TV provider Nilesat launched Nilesat 201, a new satellite that will augment Egypt's current 560 satellite channels by another 500. The platform's broadcast footprint

will cover not only Egypt, but the entire Middle East, southern Europe, Sudan and upstream Nile nations as well.

- Nilesat 201 offers a "tremendous opportunity to increase the availability of broadcasting and communications services in Egypt," said Egyptian Information Minister Anas al-Fiqi after the launch.
- Nilesat 201 is the third telecommunications satellite Nilesat has put into orbit since 1998.
